Q2 - Comprehension

Read the following passage then answer the questions

Traffic Lights

Traffic lights are very important. Because **they** help drivers know when to stop and go. Traffic lights were first introduced in December 1868 in London. They change to three colors: green, yellow and red. Drivers must know what each color means.

Green means go. When the traffic light is green drivers can go. When one side of traffic has a green light, the other side has a red light.

Yellow means slow down. When the traffic lights turn yellow, a driver needs to slow down and get ready to stop. A yellow light signals to the drivers that a red light is coming soon. Red means stop. When the traffic light is red, cars must stop. The cars have to wait until it is their turn to go. It is important for drivers to stop at the right time.
